***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable because the art of record, considered alone or in combination, neither anticipates nor renders obvious an apparatus for the production of wood composite boards comprising: a press having platens for forming the board; *a heating means comprising a heat exchanger*; and means for regulating the temperature of the platens *that includes means for circulating a heating fluid through the heating means* and the platens and *means for detecting the temperature of the heating fluid as it exits the platens, wherein the heating fluid is selected from the group consisting of heated natural gas, superheated steam and heated oil*, in combination with the rest of the claimed limitations.

US 3,785,279 to Fails is the closest reference to the instant invention. But Fails fails to disclose or suggest the circulation of heating fluid *through a heating means having a heat exchanger* and the heating fluid is selected from the group consisting of heated natural gas, *superheated* steam and heated oil.

US 4,365,547 to McClure, Jr. discloses a platen press. McClure, Jr. fails to disclose or suggest means for detecting the temperature of the heating fluid *as it exits the platens* and the heating fluid is selected from the group consisting of heated natural gas, *superheated* steam and heated oil.

None of the above references, by themselves, or in combination with the other cited prior art, disclose the invention as claimed in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
